

ContiPressureCheck™

Instructions for updating the Hand-held Tool

Download and Update Installation Instructions

1. Unzip File

- › Unzip the file
“CPC-update-package __yyyy-mm-dd.zip”.
- › If the download of the zip file was blocked by your firewall / virus scanner, please:
 - › Download the .zi1 file.
 - › After you have downloaded the file, change (rename) its extension from .zi1 to .zip.
- › Use “conti” as the password for unzipping the file.
- › It is mandatory to unzip (extract) this file.
Don't start “CPC-Update_for_HHT.vbs” within the zip file.
- › In the end, you should have the folder “CPC-update-package yyyy-mm-dd.zip” on your computer with the following content. →

2. Unzip File with IZArc

- › if IZArc is used for unzipping, please ensure that “Restore Original Folders” is activated.

3. Update Process

- › To begin the update, start the file, “CPC-Update_for_HHT.vbs” in the extracted folder, not within the zip file.
- › Select the language by entering the relevant number and follow the instructions shown on the computer screen.
- › The update process is split into two steps:
 - › Update of firmware
 - › Update of SD card content

4. Problems with Memory Card

- › If problems with the memory card are detected, start the “Scan and fix” process. Ensure that both checkboxes are ticked in the next window.
- › Now click the “Start” button. At the end, you should get this message.
- › Finally, continue with the software update process.

5. Final Steps

- › Mandatory steps:
 - › Power up your hand-held tool again:
 - › If the software update was successful, you should be able to see the following within “Setup/Release” menu:
 - › FW version: 7.52
 - › DB version: 2.20
 - › If the update was not successful, repeat the whole process again.
 - › Select your language under “Setup/Language”. If necessary, adjust the other settings within the “Setup” menu.
