

TractorMaster: Continental Expands Agricultural Tire Portfolio with Advanced Tractor Tire

- **Advanced tractor tire comes with new D.fine lug technology**
- **First sizes of new TractorMaster in 65 percent aspect ratio available from mid-September**
- **Additional sizes with 70 and 75 percent aspect ratio will follow**

Hanover, September 4, 2018. Continental is expanding its product portfolio in the agricultural sector. The TractorMaster advanced radial tire complements the standard tires Tractor70 and Tractor85 which have been available since last year.

TractorMaster with new D.fine lug technology

Like the standard tractor tires, the TractorMaster comes with a flexible N.flex carcass and specially developed single-wire bead technology. The high elongation of the nylon material used for the carcass makes the tire robust and impact-resistant. The special bead design with a single-wire bead enables high deflection performance of the sidewall, ensuring very low soil compaction. A completely newly developed lug technology called D.fine with a five-percent-larger lug surface than standard tires ensures high tire mileage.

The tires will roll off the assembly line of the agricultural tire manufacturing facilities in Lousado, Portugal. The first sizes 540/65R28 and 650/65R38 will be available from mid-September. Further sizes will follow in the next few months.

Continental develops pioneering technologies and services for sustainable and networked mobility of people and their goods. Founded in 1871, the technology company offers safe, efficient, intelligent and affordable solutions for vehicles, machines, traffic and transport. In 2017, Continental generated sales of approximately €44 billion and currently employs more than 243,000 people in 60 countries.

The Tire division has 24 production and development locations worldwide. As one of the leading tire manufacturers with around 54,000 employees, the division posted sales of €11.3 billion in 2017. Continental ranks among the technology leaders in tire production and offers a broad product range for passenger cars, commercial vehicles and two-wheelers. Through continuous investment in R&D, Continental makes a major contribution to safe, cost-effective and ecologically efficient mobility. The Tire division's portfolio includes services for the tire trade and for fleet applications, as well as digital management systems for commercial vehicle tires.
