HDL2 Eco Plus
Fuel Efficient, Super Single Drive
Applications: Long haul, over the highway drive position.

### Note
- Rim listed first is the measuring rim. Minimum Dual Spacing calculated without chains.
- ECE Certified
- Exceeding the lawful speed limit is neither recommended nor endorsed. Overall widths will change 0.1 inch (2.5 mm) for each 0.25 inch change in rim width. Minimum dual spacing should be adjusted accordingly. Continental Tire the Americas, LLC reserves the right to change product specifications at any time without notice or obligations. Please consult rim manufacturers load and inflation limits. Never exceed rim manufacturers limits without permission of component manufacturer.

### Applications
- Long haul, over the highway drive position.

**Advanced tread compound** with super single weight reduction provides lower rolling resistance.

Features 27/32” tread depth, an **evolving sipe tread design** and closed shoulder.

Groove geometry designed with stress reduction elements to separate forces and reduce premature wear.

3-dimensional center sipes increase groove strength for longevity, while allowing more tread block flexibility.
