

Conti Hybrid HS3+

More powerful than ever.

We've listened to your feedback, tracked our tyre's performance in the field and improved the best to take you even further. The new Conti Hybrid HS3+ features a new tread design, which further improves robustness and mileage potential.

New surface styling for higher mileage

New inner groove technology ensures even wear

Full-depth pocket sipes at 50% of rib width ensures even wear and enhances water displacement for improved performance in the wet

New W-groove technology enables even distribution of forces along the groove when cornering, reducing stress on the tyre and extending service life
