

# Construction For Durability On & Off-Road

Superior Mileage // Durable Cut/Chip Compounding // Resistance to Stone Drilling // Optimal Retreadability

**Engineered for your application.** Tires for Construction and On/Off Road use are designed for vocational applications such as utility trucks, concrete mixers, and dump trucks, etc., where they spend some time on the pavement but are also likely to encounter curbs, stones, debris, and tight turns. Tires are optimized for durability and traction, as well as minimal stone retention and cut-and-tear resistance.

**IMPORTANT NOTE:** Tire Products are now classified by route. Product details are subject to change, please visit our website or contact your local sales representative for the most up to date information.
