TECHNOLOGY

German engineered longevity.

The new UltraContact.

Our recipe for ultra-long-lasting driving pleasure.

Since driving is so much more fun than caring for new tyres, the UltraContact - with its YellowChili compound and harmonized tread pattern design - provides you with ultra-high mileage and a safe and balanced driving experience. So that you don't have to worry about buying new tyres for a very, very long time.

When streets are rough, this tyre remains tough.

Driving is a pleasure when you know that almost nothing can stop you. The new UltraContact has been developed to give you exactly this feeling: Its all-round protective construction with the thick and robust UltraShield casing provides remarkable damage protection for everyday driving. Well, we wish you a pleasant time on many different streets - whether they are rough or smooth.

For safe performance on rainy roads.

We want you to enjoy every mile you spend on the road - even if it rains. A high amount of uniquely shaped sipes increases the so-called wipe-out effect of water and enable short braking distances, while special noise breakers in the grooves lead to significant noise reduction. Just to make sure that every drive you start will be a safe and comfortable one.

Dimensions.

Tyre width in mm:

155-245

Tyre cross section:

40-80

Rim size in inches:

14-20

Speed symbol:

T-Y

EU tyre label values

Fuel efficiency: B-C

Wet braking: A

Noise level: A-B (68-72 db)
