

CS20

Saves on energy consumption.
But not on comfort.

Innovative double-L tread.

The new CS20 is fascinating because of its new tread design. The double-L tread with closed shoulder immediately offers several advantages. Annoying vibrations are minimised whilst at the same time providing good traction and excellent cornering stability.

In addition to the superior handling characteristics, the tire also provides very low rolling resistance. The CS20 raises bar for ride comfort and low operating costs to the next level.

	Tread design	
	Revolutionary double-L tread	Good traction
	Continuous tread belts	Very good lateral loads
	Rounded groove contour	Excellent self-cleaning
	Tread	
	Smooth and even tread	Low rolling resistance supported by optimised compound technology
	Block-free tread	Even wear
	Contour	
	Closed shoulder	Low vibrations Maximum running smoothness
	Level contour	Very quiet rolling characteristics
