Your Partner at Zero Altitude.
Continental Tire Solutions for Ground Services.
Continental is the only supplier to offer a wide portfolio of ground handling tires for the airport industry. Whether Industrial, Passenger, MPT or Truck Tires, Continental tires are the best solution for anyone concerned about their operating costs. Continental satisfies specific airport customer requirements with a broad portfolio of specialized products having finely balanced performance features, which are designed for the variety of functions and vehicles found there. Competitors try to implement a general product for multiple applications, which sometimes does not fully deliver the optimum performance.
1 Baggage Loader
Transports/loads single bags to/from the airplane cargo hold

2 Water Supply Truck
Supplies water to the aircraft

3 Cabin Cleaning Truck
Used to clean passenger cabin and replace blankets, soap etc.

4 De-Icing Truck
Transports and sprays de-icing solution on leading and trailing edges

5 Lavatory Truck
Used to pump waste from aircraft lavatory tanks

6 Snow Plough
Clears snow from the runway, taxiways and terminal area (tarmac)

7 Catering Truck
Transports and delivers food and beverages to the aircraft

8 Container/Pallet Transporter
Used for transporting freight containers
**Continental**

1. **Container Loader**
   Used to load/unload freight

2. **Push Back Tractor**
   Pushes aircraft away from the gate to the taxiway

3. **Tow Tractor**
   Tows luggage/freight dollies and equipment, and serves as general transportation

4. **Ground Power Unit**
   Powers aircraft when engines are shut down

5. **Aircraft Taxi**
   Directs airplanes to/from runway and terminal

6. **Fire Truck**
   Is always on standby to fight fires

7. **Passenger Bus and VIP/Crew Transport Vehicle**
   Transport passengers to/from the airplane

8. **Ramp Supervisor Vehicle**
   Transports ground support and services supervisors

9. **Fuel Truck**
   Transports and delivers fuel to the aircraft

**Competitors**

10. **Baggage and Cargo Handling**
11. **Pushbacks**
12. **Service**
13. **Passenger Transportation**
14. **Runway**

Product Highlights for Airport Ground Handling Equipment

**ContiRV20**
- Pneumatic radial tire with ribbed & closed shoulder tread design to minimize vibration & uneven wear for maximum mileage & ride comfort
- Robust industrial construction to restrict impact of FOD (foreign object damage)
- Innovative compound ensuring low rolling resistance which reduces fuel consumption & CO₂ output

**CS20**
- Solid tire for use on tow tractors where requirements are for a puncture proof with no air pressure control maintenance
- Closed shoulder design for low vibration, maximum comfort & improved vehicle handling
- Double L tread design for optimum traction on airport apron ground surfaces
StraddleMaster

V.Ply Technology combines an extremely stable footprint with strong sidewalls

Perfect airport push back tire where strength & durability are required

Smooth transmission of forces to move aircrafts safely & securely
Tow Tractors
Single cabin | Double cabin | Platform trucks | Open cabin

Whether pneumatic or solid tires are preferred Continental offers both tire types for the optimum tow tractor fitment solution.

Pneumatic Tires
› Radial

Solid Tires
› Super Elastic

ContiRV20

CS20
Continental offers various tire solutions for baggage & cargo handling vehicles.

Pushback
Towbar pushback tractors | Towbarless pushback tractors

Whether a large pushback tractor moving big aircrafts or small pushback tractor pushing an executive jet Continental tires for pushback’s offer strength & durability to ensure the smooth transmission of the forces needed when moving aircraft safely & securely.

**Pneumatic Tires**

- Radial

**Pneumatic Tires**

- V.Ply Technology

- ContiRV20
- IC40
- CraneMaster
- StraddleMaster
Passenger Transportation
Buses | VIP transport vehicles | Crew transport vehicles

Continental passenger & bus tires offer a wide range of different premium quality products to ensure all passenger’s & crew reach the aircraft safely & on time.

Available in both summer & winter versions Continental offer the correct product whatever the weather.

**Bus Tires**

- Conti Urban HA3
- Conti Urban HA3 M+S
- Conti UrbanScandinavia HA3
- Conti UrbanScandinavia HD3

**Passenger Car & Van Tires**

- ContiPremium Contact 5
- Conti WinterContact TS850
- Conti VanContact 100
- Conti VanContact 200

1) All-Axle Fitment
2) Drive axle tire
Runway
Snow ploughs | Cleaning machines | Fire trucks | Aircraft taxis

A wide range of vehicles in different operations ensure the runway is kept in full working order making sure the airport can fulfill its prime function.
Continental offers a wide range of tires for these vehicles such as snow ploughs, cleaning & sweeper machines, fire trucks and follow me vehicles to ensure the runway is ready for take off & landing.

2) Drive axle tire
3) Trailer tire
Reducing Costs. with Technology.

Minimize Foreign Object Damage (FOD - Foreign Object Damage)

Foreign Object Damage is an essential topic for the safety of airports. Therefore, Continental Tires are designed to minimize the production and transportation of foreign objects on the airfield. How is this done?

NOTE: Tire solutions have the possibility to reduce or minimize tire-related FOD, but do not eliminate FOD presence on the airfield or the risk of damage to aircrafts. They also do not replace the need for FOD checkpoints and other anti-FOD measures.

Foreign Object Trapping

Tread patterns are designed to reduce or eliminate the trapping of foreign objects.

Foreign Object Creation

Tire constructions with flexible carcasses, such as radial pneumatic, combined with even tread wear reduce vehicle vibration and therefore lower the risk of ‘creating’ foreign objects. Tire treads with ribbed profiles are less subject to losing tread rubber after impacts or tearing.

Foreign Object Damage to Ground Support Vehicles

Robust tire constructions reduce vehicle downtime due to tire failures from FOD.

Lower your Total Cost of Ownership

Choosing Continental tires can decrease your Total Cost of Ownership, particularly energy costs, operating costs, downtime costs, and overall tire costs.

Continental Airport Solutions
Pioneering eco-friendly innovations

Continental Commercial Specialty Tires (CST) continuously invests in the development of sustainable innovations for economically and ecologically efficient mobility. Besides the reduction of fuel and energy consumption, the tire manufacturer focuses on enhancing the tires’ performance with regard to a long service-life and an extended lifecycle. Long-lasting tires consume less energy across the entire supply chain, including application. Furthermore, Continental CST finds it particularly important to use environmental-friendly raw materials.

The company works on pioneering renewable resources such as Taraxagum. For these successful initiatives, Continental has received the European environment prize “GreenTec Award”. The tire manufacturer is also obliged to the European Chemicals Directive REACH that stipulates the Registration, Evaluation, Authorization and Restriction of Chemicals. Continental CST will continue to work on enhancing the sustainable performance of its tires so as to make a valuable contribution to the protection of the environment and to a cleaner future.
